

# THE ROSE "is good COFFEE"

## Attract The Tourists

It is an economic truism that the imports and exports of a country must balance. That is to say, if a country imports more than it exports it must pay the difference in gold, which means that it sends money out of the country, that is, exports it. Thus is the balance maintained. On the other hand, if a country exports more than it imports then it has to be paid, which means an import of gold. Thus the country whose exports in raw materials, natural products, manufactured goods and general merchandise exceed imports of a like character, and to whom the importing countries must therefore remit gold in order to balance accounts, can hardly help but prosper and grow wealthy.

There are, however, what are termed invisible imports. For example, Great Britain is obliged to import food and other necessities of life on a huge scale, and it is not infrequently happens that British exports of coal and manufactures do not equal these imports in value. Thus the balance of tangible trade is against Great Britain. But this is more than offset by the fact that the mercantile marine of Great Britain is the greatest trade carrying agency in the world and all countries pay tribute to Britain. The earnings of British shipping constitute a great but invisible import, and these imports, like exports, add to the national product and wealth.

There is another class of imports which operates in the same advantageous way, and one in regard to which Nature has equipped Canada to reap great benefits if the Canadian people make full use of their opportunities. We refer to tourist traffic, for tourist brings at least one thing with him—money. He spends it in travelling and hotel expenses, in means of recreation and pleasure, and in purchases in the country visited. Making Canada attractive from the standpoint of the tourist is, therefore, good national business. It will not only draw countless thousands of visitors from other countries, but it will encourage Canadians to spend their vacation in Canada, thus keeping their money at work for and in Canada, and in making them better acquainted with the Dominion and its enormous possibilities.

As already stated, Nature has done its part in richly endowing Canada with some of the finest scenery in the world and by making the Dominion a veritable sportsman's paradise. The Canadian climate, both in summer and winter, makes a strong appeal. But these things are not enough in this age. Tourists not only demand these things, and a marked change from the environment in which they live most of the year, but they insist on all modern comforts and conveniences, and go where they can be obtained.

Canada must, therefore, be made a country noted for its good roads if it is to capture any large share of the automobile tourist traffic which has now reached such large proportions. Canada must cater to the needs and tastes of all tourists by chains of good hotels, by bungalow camps, attractive summer and winter resorts.

Tourists will go where the greatest beauty beckons, the best roads lead and reasonable comfort and necessary conveniences can be enjoyed. A motoring tourist along a good road arriving at a town or village which presents a well kept and clean appearance, streets well treed, an attractive lake, and residential lots, both back and front, tidy and with trees, shrubbery, grassy spaces and flowers, and where the hotel, no matter how small, is spotlessly clean and good meals served, will almost certainly stay awhile. But the town or village is the opposite of these things, it is even more of a certainty that the tourist will hurry right on.

It costs some money to make our prairie cities, towns and villages pleasant and attractive. But it takes more of time and patience than it does real money to transform them as many have been and are being transformed into places of real beauty and restfulness. It is the development of the right type of community public spirit that really counts in the achievement of results.

The securing of a fair share of the growing tourist traffic of the continent is something that no town or village can afford to neglect. It is cash business, and frequently leads to larger and unexpected business developments, because many a tourist while on pleasure bent is also keeping an eye open for investment and business opportunities.

And the making of the home town bright, clean and attractive is in itself paying dividends to all the townspeople in increased local pride and pleasure at home throughout the whole year.

## Must Fly British Flag

## High Altitude Affects Taste

Using Other Flags Alone Forbidden by

Everest Climbers Found Onions and

**Bermuda Law**  
Because so many houses in Bermuda were flying the United States flag alone, the Bermuda House of Assembly has passed an act forbidding the flying of any flag unless the British flag is also flown. The United States flag was being displayed to attract tourists. It was ascertained, and not because the inmates of the house were Americans.

**Peppermint Not as Flavor**

A curious effect of high altitude was found, it is said, by the men who tried to reach the summit of Mount Everest. At a height of nineteen thousand feet the explorers lost their sense of taste, meat food as onions but no flavor, and peppermint had no pep left by which it might be known.

**Fingerprints Fail**

Score one against the Bertillon system. Fingerprints of two prisoners in New York could not be classified by police because ridges of their fingers had been worn off during bricklaying operations.

**The only innocent, harmless things**

to which man has a natural aversion are worms and slugs.

**MOTHER—Fletcher's**

Castoria is a pleasant, harmless

Substitute for Castor Oil, Purgative, Teething Drops

and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher* Proven directions on each package. Physicians everywhere recommend it.

## Is Learning the Business

Heir to Woolworth Millions Working

in Long Island Store

Newspaper supplement editors will be glad to learn that Mr. Norman Woolworth, of the second generation in five and ten cent stores business, is hard at work in the F. W. Woolworth store in Flushing, Long Island. Mr. Woolworth, whose income is said to reach \$3,500 a day, is serving out his time under one of those queer wills which make it incumbent upon the heir to learn the business from the bottom up. He wears overalls in the cellar, where he is officially known as "head of stock."

When the six p.m. ring clangs a large Lincoln draws up to the door of the five and ten, and the pumpkin develops six cylinders, with a liveried chauffeur in attendance. The heir to the Woolworth millions gives James the high sign and is driven down the road a bit to one of the show places of Flushing, where he lives.—The New Yorker.

## They Worked a

Miracle for Him

So Says Ontario Man of Dodd's Kidney Pills

Mr. H. Austin suffered with backache, headache, and was gradually losing strength.

Coldwater, Ont.—(Special).—There is no more enthusiastic believer in Dodd's Kidney Pills anywhere than Mr. H. Austin, a well-known resident here. He has good reasons for his enthusiasm. He writes: "This is to praise Dodd's Kidney Pills for what they have done for me. I think it a miracle. I suffered so much with my kidneys and pains in my back. My head ached, and in fact seemed to lose my strength. After using six boxes of Dodd's pills, I am now quite well. Thanks to Dodd's Kidney Pills, which I always keep in my house now. I have gained in weight."

Many men suffer periodically with backache and, as middle age approaches, the pain increases in severity. Best may give temporary relief, but Dodd's Kidney Pills do more than this. They strengthen weak kidneys and remove the cause of the pain.

Obtained from druggists everywhere, or The Dodd's Medicine Co., Ltd., Toronto 2.

## Vodka Has Bad Effect

Is Blamed For Growth of Loafing in Soviet Factories

The re-introduction by the Russian Government of vodka of the strength of 40 degrees is blamed by many in that land for the growing increase of loafing and absenteeism from work in Soviet factories.

The whole press, with *Economic Life* and *The Moscow Worker*, is waging an against-loafing campaign. A worker corresponds from many factories point out, the decline began last fall, which seems to connect it definitely with vodka.

One writer from the Moscow steel works says: "Unnecessary absences from work increase 25 per cent after pay days, the reason being drunkenness," which seems to dispose of one alternative reason advanced in some quarters that the growth of Soviet loafing has brought in a number of unqualified workers from the country, lacking labor discipline and the cause of their travelling expenses, paying their wives (who remain at home) the men's usual wages, giving the men one hundred dollars each for extra clothes and fifteen dollars a week spending money, and providing each with a five to ten thousand dollar life and accident insurance policy while on the trip.

## Studying Industrial Conditions

Eight English Workmen Sent to U. S. by London Paper

A unique delegation arrived in New York recently aboard the *Carmania*. They were eight British workmen. One was a patternmaker, one a boiler-maker, one a blacksmith, one a tool-maker, one a welder, one an ironworker, one a fitter, one a "machine man." They came to the United States for four weeks on invitation of the London Daily Mail, one of Lord Rothermere's papers. They are eight actual workers, not labor leaders, sent to examine working conditions, wages and industrial methods in the United States. The newspaper is paying all their travelling expenses, paying their wives (who remain at home) the men's usual wages, giving the men one hundred dollars each for extra clothes and fifteen dollars a week spending money, and providing each with a five to ten thousand dollar life and accident insurance policy while on the trip.

Boys' Hostel At Edmonton

The Church of England has opened a boys' hostel at Edmonton, the first of its kind in Alberta. The first lot of boys who will be cared for at this institution will arrive this month under the auspices of the church. A similar hostel has been operated in Montreal for some time and has met with considerable success, in placing boys on farms in the provinces of Quebec and Ontario.

## A Reciprocal Tariff

Canada Would Reduce Duty On Cattle If United States Takes First Step

Hon. W. R. Motherwell, minister of agriculture, announced in the House of Commons that the Canadian Government was prepared to adopt a "brink for a brick policy" with the United States in the reduction of duties on cattle. "Every step taken by the United States Government," he said, "in the way of a reduction in duty on Canadian cattle will be met by a corresponding reduction in the Canadian duty against American cattle." That is to say, if the United States take off the tariff wall against Americans take off the tariff wall against us will be met with the removal of a corresponding brick from our tariff against American cattle."

Mr. Motherwell announced that the government this month had passed an order-in-council authorizing the minister to take such action as may be necessary in the direction of reducing the Canadian tariff on cattle in the event of the United States making similar reductions.

## HOW WEAK GIRLS CAN GAIN STRENGTH

It Comes Through the Tonic

Blood-Making Power of Dr. Williams' Pink Pills

In the life of almost every girl there comes a time when weakness attacks her. The strain upon her blood supply becomes too great and the result is poor blood and backaches, loss of appetite, and a general feeling of languor. This is the result of a deficiency in the blood-making power of the system, and a tendency to a decline. All this is not present in all girls, but the presence of any one of them shows the necessity of a blood-making tonic. There is no other treatment so sure and so speedy as that through the blood-making power of Dr. Williams' Pink Pills. They are the one thing needed to maintain the health of growing girls and women of mature life.

Here is a bit of positive proof of the value of Dr. Williams' Pink Pills. Miss Clara Fraser, Theatrical, Ont., has been brought back to health and strength through the use of this medicine, and gives expression of her gratitude as follows:—"I feel it a duty as well as a pleasure to tell you what Dr. Williams' Pink Pills have done for me. They have restored me to health, I indeed, they did not save my life. I was suffering greatly from anemia, I had flesh and always felt tired and nervous. At last I grew weak and I was brought back to health. The doctor told me to eat meat and I was eating meat, but my health was not getting better. At last a friend who told me to take Dr. Williams' Pink Pills. I took a similar case restored by Dr. Williams' Pink Pills and urged me to try them. I felt hopeful but decided to take my advice, so my mother got me a supply of the pills and I began taking them. It was not long before I began to feel better from the use of the pills, and in less than two months my health was restored. In fact I was in better health than I had ever enjoyed before. I strongly recommend Dr. Williams' Pink Pills to all who are weak and run down, for I feel sure they will not be disappointed."

You can get these pills from any medicine dealer or by mail at 50c a box from Dr. Williams' Medicine Co., Brockville, Ont.

'Acreage in Sugar Beets in the Irrigated districts of Southern Alberta, will reach 7,000 acres this season. This is 3,000 acres more than the contracted area of last season.

## Madame Lenin Disillusioned

Tired of Soviets Asks Permission to

Settle in England

Madame Lenin, widow of the great Bolshevik leader, has had enough of the land of Soviets and has applied for permission to settle in England, according to a dispatch to the London Times.

The Russian authorities are doing their utmost to restrain the lady, who is known there as Comrade Krupskaya, from carrying out her intentions. Not to be sure, that they are so enormously fond of her, as she has been a merciless critic, but because they fear that she will devote her time in England to the writing of an exposé of the Red movement that would be like a smothering thud in the Bolshevik camp. It is plain, however, that Madame Lenin is disillusioned as much as Emma Goldman and Alexander Berkman. Her desire to break away from Russia at this time would again show the ironical conflict between the dreams of the ideologist and the hard facts of reality. If Comrade Lenin succeeds in getting out of Russia, which he after all is no easy matter, as Trotsky discovered, she will be able to give a true picture of Russia and none of the naive accounts that the world had from such credulous individuals as constituted most of the different missions that went to Russia for investigation, and who were shown only the polished surface and not the ugly inside of things.—New York Evening World.

## Pain In The Muscles, Stiffness In Joints,

Quickly Subdued By Nervine

Those who have tested out numerous balms will agree that when something is needed to allude a deep-seated, more or less chronic condition, it is best to compare with Nervine. It is because Nervine penetrates so deeply, because it has the strength of the strength of ordinary oil preparation, it has come to be known as King over all Pains. For Rheumatic conditions, muscular and joint stiffness, Nervine works wonders, and its trial proves this. Get a 25 cent bottle from your dealer today.

## Cannibalism Exists In French West Africa

Indulged In By Secret Society Of White Doctors

Cannibalism exists and is practiced to a considerable extent in several villages in French West Africa, bordering the Liberian coast. This cannibalism is indulged in by white doctors who form a small but active secret society. Recently two of them, one a woman, were arrested. The details of the manner in which two children had been murdered and eaten by the white doctors. She explained that the rules of their secret society demanded that the victim should always be killed to death by seven of the white doctors, who otherwise would lose their magic powers. Members of the society were most particular always to sacrifice members of their own family. The child was cut up, the flesh of strangers might be withheld.

## Report On Hebrideans

Of the twelve families—60 people—brought in from the Hebrides for settlement in Canada last year, one family—one adult and five children—has been deported because they became a public charge. In the House of Commons in answer to a question it was also stated that Mr. Macdonald, who supervises the assisted immigration of the Hebrideans was paid \$1,741 salary and \$2,177 expenses.

Gentleman Visitor:—but after my cold shower this morning, I felt as lively as a two-year-old pup."

Little Billy: "With peas?"

"In certain gulfs and boys the tide rises as high as 50 feet."

It never reduces the size of a claim against an estate to file it.

## She Couldn't Sleep Heart Was So Bad

Mrs. J. D. McIntosh, Charlotte, N.C., writes:—"About a year ago I was greatly troubled with my heart."

I could not sleep at night, and was so nervous I imagined that I could see everything in the room moving, and would have to turn on the lights before I could get to sleep.

After having read of your

MILBURN'S HEART NERVE PILLS

I took several boxes of them, and soon got a full night's sleep, and was no longer so nervous, and I was able to do my work, and feel fine in every way."

H. A. N. Pills have been on the market for the past 25 years, only dealers sell them in large quantities. T. Milburn Co., Limited, Toronto, Ont.

Minard's Liniment King of Pain

## CRISIS IN EGYPT IS THE CAUSE OF GRAVE CONCERN

LONDON.—With a ministerial crisis pending in Egypt and having in mind the acquittal of the alleged assassin of Sir Lee Stack, British Sirdar of the Egyptian army in 1924, Great Britain has informed the Egyptian Government that it reserves "complete liberty of action."

The British Government is backing up this notification by the dispatch to Alexandria of a warship from Malta, designating this, however, as merely a precautionary measure for the protection of British and foreign interests.

The most important question at issue is the Egyptian premiership, which recent reports asserted was likely to be taken over by Zagloul Pasha, leader of the Nationalist party, whose partisans in the late elections carried a majority of the seats in the Assembly.

Zagloul Pasha is not acceptable to the British Government, but the tension has been relieved by late advice that Zagloul has, willingly or unwillingly, withdrawn his candidacy and that the new premier is likely to be Adly Yehven Pasha, constitutional Liberal.

The cabinet, under Zivir Pasha, these advice also has not yet resigned, nor has Adly Yehven definitely accepted the premiership. Not much news from Egypt has reached London for some hours, and the position, therefore, is somewhat obscure, but for the present there is nothing to suggest important developments.

## War On One Big Union

Winnipeg Mayor Says Means Must Be Found to Dissolve Organization

Winnipeg.—Open war on the One Big Union with a view to its ultimate extermination, was declared by Mayor R. H. Webb, of Winnipeg, in addressing the annual meeting of the industrial development board here.

The organization, which is regarded as the left wing of the labor movement, has its headquarters in Winnipeg.

Mayor Webb declared these means must be found to dissolve the O.B.U., which, he charged, was "undermining progress and development in the city." He criticized the federal authorities for granting the street railway men's unit of the organization a board of conciliation in effect to settle the present deadlock between the Winnipeg Electric Railway and the men. The traction company has refused to recognize the union or negotiate a new agreement with their employees who are affiliated with the O.B.U.

## To Raise New Loan

Dominion Loan Not Exceeding \$150,000,000 To Be Bought

Ottawa.—Authorization to raise a Dominion loan not exceeding \$150,000,000 will soon be sought from parliament by Hon. J. A. Macdonald, minister of finance. The loan is for the purpose of paying, redeeming or otherwise retiring the whole or any part of loan obligations of Canada and for public works and general purposes.

The Dominion Government has \$35,000,000 in two-year notes maturing October 1, and \$3,000,000 in two-year notes maturing November 15.

## Deport Foreign Priests

San Salvador, Republic of Salvador.

The Guatemalan Government has deported a number of priests charged with interfering in politics. The government also has issued a decree forbidding Jesuit priests from entering the country and prohibiting the functioning of foreign priests without special government permits.

## Franco-Syrian Treaty

Paris.—A Havas dispatch from Constantinople says that the French ambassador, Albert Sarraut, and Tewfik Ruzhidi, foreign minister at Ankara, have signed a Franco-Syrian treaty.

The treaty was negotiated several weeks ago by Henry De Jouvenel, French high commissioner for Syria.

## Arrest U. S. Diplomat

Honolulu.—A special dispatch from Tokyo to Hochi Shiki, Japanese newspaper, says that O. K. White, a member of the United States embassy staff in the Japanese capital, was arrested while taking photographs in the Sasebo naval base.

## May Be Exiled So Corica

Paris.—The Petit Parisien quotes a Rabat (Morocco) newspaper as saying that Abdel-Krim, the surrendered Rifian chief, will probably be exiled to Cordoba.

## W. N. U. 1622

## Protest From Livestock Board Says China Resents Foreign Interference

Open Letter Is Sent To The Minister of Agriculture

Winnipeg.—The board of directors of the Winnipeg Livestock Exchange has sent an open letter to Hon. W. R. Moberly, minister of agriculture, in opposition to what is termed in the letter "propaganda" published by the effect that the livestock exchanges regulations on the western markets are opposed to the marketing of cooperative shipments of livestock and the pooling of livestock.

The letter states that the exchange had wired the minister asking if he had been correctly quoted in recent interviews and that the following reply had been received from Mr. Moberly:

"I have a formal interview to matter referred to, but did draw attention of press men that co-operative marketing in west had now become so general and popular that at present stockyard regulations did not permit farmers pooling their livestock sales legitimately, then it might, and possibly would, be desirable to change such regulations."

The letter says the exchange "would be pleased to be advised by you just what regulations oppose the marketing of co-operative livestock or the pooling of livestock."

The letter points out that practically all exchanges in the west operate under the same regulations; that if there are any regulations prohibiting the practices named, that the exchange would assist in removing them "for good business reasons." In regard to the latter it is stated that such regulations would affect all the commission firms operating on the Winnipeg exchange.

## Tidal Wave In Burma

Death Toll Has Reached A Total Of 2,500

Rangoon, Burma.—The death toll of the recent cyclone and tidal wave on the coast of Burma has reached a total of 2,500, according to a report submitted by the commissioner of the district of Arakan.

It is feared that the total number of deaths may reach almost 4,000 in the affected regions.

Huge property loss has been suffered through the area which was swept by the gigantic death-dealing gale. Residents fled hurriedly from their homes in a desperate but often vain effort to escape the pursuing deluge, and they left their personal effects behind.

Relief work is progressing as well as possible, but it is said to be totally inadequate to meet the present situation.

## Canadian Envoy To U. S.

Appointment Is To Be Made Says Senator Dandurand

Ottawa.—Senator Dandurand, government leader, replying to a question in the senate, said the government is about to appoint a minister plenipotentiary to Washington. As to when the appointment would be made, this was under consideration.

Senator Dandurand said there had been no correspondence between the Canadian and the United States Governments in reference to the appointment of an American ambassador to Ottawa.

## Will Not Receive Degree

Cambridge University Withdraws Proposal to Honor Ramsay MacDonald

LONDON.—Cambridge University has withdrawn its proposal to bestow the honorary degree of Doctor of Laws upon former premier Ramsay MacDonald, parliamentary chief of the Labor party.

Notification was given that there would be some opposition in the senate of the university, and Mr. MacDonald intimated that he had no desire to receive a degree by majority vote.

## Foot and Mouth Disease

LONDON.—The foot and mouth disease of cattle is found into England in the carcasses of pigs imported from the continent by British factories which cure the meat of the pigs.

Mr. Walter Guinness, minister of agriculture and fisheries, made this statement in an address to the council of agriculture of Middlesex County at the Guildhall.

## Missing Evangelist

Los Angeles.—The Los Angeles Times says it has heard through confidential, but thoroughly reliable sources that Mr. Minnie Kennedy, minister of Almee Semple McPherson, missing evangelist, is negotiating with two men who declare they will return Mrs. McPherson the \$25,000 reward recently offered by Mrs. Kennedy.

## ALBERTA SCHOOL QUESTION GOES TO SUPREME COURT

U. S. Legislation Not Possible Before Next Congress Meets

Washington.—Talk here in reference to the cattle tariff, growing out of Hon. W. R. Moberly's statement to the House of Commons at Ottawa, is that there is no likelihood of any change in the present situation in the future.

It is pointed out that no legislation is possible before the seventeenth congress, which will be elected next November, but will not meet in regular session for a year and a half.

So far as the cattle tariff is concerned officials of the tariff commission point out there is nothing formal before them of cattle rates. While there has been agitation by some livestock interests on this side to let down the bars as to feeder cattle other livestock interests are fighting the proposition.

With a congressional campaign on and with the agricultural situation in the middle west, north-west and south-west, the likelihood of the tariff is, it is felt here, for opening up the cattle tariff question.

Mr. Lapointe said the amendment made by the legislature of Alberta, "without our consent" to the natural resources bill suggested that the laws of the province might differ from, or be in conflict with Section 17 of the Alberta Act. Otherwise, the amendment would be useless and futile.

The Alberta Act had stood as the constitution of the province for 21 years. "We cannot directly or indirectly, even in a tact manner, acknowledge that its validity might be subject to question," added Mr. Lapointe.

However, the Dominion Government was prepared to take immediate steps for a reference to the Supreme Court. "We will submit the act and support its validity and give an opportunity to those who question it to present their views," Mr. Lapointe said.

## Higher Favorable Trade Balance

Canada's Excess of Exports Over Imports Greatly Increased

Ottawa.—Canada's favorable balance of trade (the excess of domestic exports over imports) was nearly \$380,000,000 in the 12 months ending April 30.

This is nearly \$100,000,000 more than in the 12 months ending April 30, 1925.

In the 12 months ending April, 1926, domestic exports were \$1,215,000,000; imports \$225,000,000. The excess of exports over imports was \$370,000,000.

In the 12 months ending April, 1925, domestic exports were \$1,080,000,000; imports \$795,000,000. Excess of exports over imports \$285,000,000.

## HAS CONFIDENCE THAT MERCHANT MARINE WILL PAY

Ottawa.—"I am very far from regarding the Canadian Government Merchant Marine as it is sometimes lightly and ridiculously called a 'white elephant,'" Sir Henry Thornton said in reply to a question before the railway committee of the house.

He was hopeful that with caution in its management, diligence, economy, and due regard to pushing its business the merchant marine would be able in future years to show a substantial profit on its operation, although it would not, at least for many years to come, be able to return interest on the amount of money the ships cost.

"For the first five months of this year," Sir Henry said, "the C.M.M. had an operating profit of \$62,000. This is the first time of any profit of period that it has been able to show a substantial profit."

He added that was a pleasant indication not only for the government ships, but also showed an improvement in international trade which was beginning to get back into its stride.

"With regard to the Canada West India trade," said Sir Henry, "it does offer considerable promise. We will be in a favorable position by getting in early. The next ten years will be profitable to whoever goes into it and to Canada."

## Cure For Leprosy

New Treatment Devised Meets With Great Success

Berlin.—A new treatment for leprosy has been devised by Prof. S. P. P. of the University of Dorpat, Estonia, who in an article in the German Dermatological Journal, announces that after many years of experimentation, he had succeeded in curing the leprosy germ by means of freezing.

Carbolic acid "snow" was applied to diseased tissue with the results that of 15 patients treated, seven already have been discharged as wholly innocuous to society, the article said.

## Will Not Be Candidate

Edmonton.—Ex-premier Herbert Greenfield has announced that, if not a candidate in the Alberta general election June 28. He expects to take an active part in the campaign, addressing meetings on behalf of the U.F.A. candidates.

## Three Life Savers On World Cruise

Photography ranks among the most popular of the many pastimes on board ships making cruises around the world. Under sunny skies and with perfect weather conditions, no many can resist the lure of the little black box which magically reproduces striking likenesses of places and people.

Soon after breakfast an army of amateur photographers appear on the scene prepared to "shoot" anything in sight, providing the interest is good enough. Tourists feel that nothing brings back happy memories of pleasant travelling days so securely and sharply as pictures.

Above, from left to right are Miss Dorothy and Miss Marjory Hager, of Vancouver, B.C., snapped on the deck of the Canadian Pacific liner Empress of Scotland, while making the Round-the-World Cruise this year. The Misses Hager with the round disk form a trio of life savers.

## ALBERTA SCHOOL QUESTION GOES TO SUPREME COURT

Ottawa.—Hon. Ernest Lapointe, minister of justice, announced in the house that the department of justice had in hand reference of the Alberta school question to the Supreme Court of Canada.

"I believe," said Mr. Lapointe, "that this solution is fair to all parties and I earnestly hope that this delicate question will in this way be settled definitely and removed forever from the field of controversy."

Mr. Lapointe said the amendment made by the legislature of Alberta, "without our consent" to the natural resources bill suggested that the laws of the province might differ from, or be in conflict with Section 17 of the Alberta Act. Otherwise, the amendment would be useless and futile.

The Alberta Act had stood as the constitution of the province for 21 years. "We cannot directly or indirectly, even in a tact manner, acknowledge that its validity might be subject to question," added Mr. Lapointe.

However, the Dominion Government was prepared to take immediate steps for a reference to the Supreme Court. "We will submit the act and support its validity and give an opportunity to those who question it to present their views," Mr. Lapointe said.

Many Injured In Gas Main Explosion

Weak Seam Given Air Cause Of Accident In Los Angeles

Los Angeles, Calif.—Nine persons were injured, some seriously, when a sixteen-inch gas main exploded in the crowded east side of the city.

With a roar that could be heard a mile distant, the blast ripped a gaping hole in the pavement 100 feet long and 15 feet wide, and plied the remains of three buildings into a dusty, smouldering heap.

Six pleasure cars and three trucks, which were passing, were lifted high into the air and dropped, demolished and burning, into the great hole.

Damage to property of \$200,000 was estimated by police. It is believed, however, that losses will exceed that figure.

A weak seam in the big main was given as the cause of the blast.

## Wembley Will Be Sold At Auction

No Private Tender Have Been Received By Liquidator

LONDON.—Wembley is to be sold. The liquidator, after valuing and endorsing to get a bid for the great exhibition grounds and buildings by private tender, have decided to put the whole up at public auction.

The site covers about 132 acres, and the sale will include the Palace of Engineering, the Palace of Industry, as well as the site of the stadium which will accommodate 100,000 people. Several of the Dominion pavilions will also be included in the sale.

## Attempt To Criticize King George Quashed

Liberties Told By Speaker It Would Not Be Allowed

LONDON.—An address of thanks to King George for his proclamation constituting the state of emergency because of the strike was made in the House of Commons on April 19.

An attempt to criticize the King by some of the Liberals, notably the Clydesdale, G. Buchanan, was quickly quashed. The speaker told the Liberals that they were not to bring the sovereign's name into the discussion because what he had done was done on the advice of his ministers.

## SERIOUS SPLIT IN LIBERAL PARTY IN GREAT BRITAIN

LONDON.—That the Liberal party of Great Britain has been completely split asunder and that all political cohesion between the Earl of Oxford and Asquith, leader of the party, and David Lloyd George, its parliamentary chairman, has been irrevocably ended is admitted by the Liberals themselves, no matter to which leader they are adhering.

Pending further developments following letters from the Earl of Oxford and his supporters, it is assumed that the Liberals in parliament will form into two groups and act independently of each other.

The National Liberal Federation, the main organization of the party, will meet the week after next. The creation of party leadership is expected to dominate all other business. It is reported that the federation will be asked to vote confidence in the Earl of Oxford.

The Daily News says nothing new can save Liberalism but action by the rank and file of the party who themselves must achieve its salvation.

## WOULD ABOLISH ALL APPEAL TO PRIVY COUNCIL

Winnipeg.—Although saying that the privy council had generally discharged its high and difficult duties with ability, knowledge, skill, impartiality and rectitude, J. B. Coyne, K.C., in an address at the gathering of the members of the Manitoba Bar Association here, declared the time had come when Canada should follow in the footsteps of Australia and South Africa, abolish all appeal to that tribunal, and make the Supreme Court of Canada the last resort for Canadian litigants.

He stressed the need of knowledge of climatic, social and business conditions on the part of the judges as a necessary requirement of those charged with the interpretation of the laws, and said that the courts of this country, having before them the great traditions and high purposes of the privy council, would not walk unworthily in the spirit that had inspired the administration of British justice.

In closing, Mr. Coyne said that speedy justice is the best justice, and that delay in either trial or execution of sentence undermines the effectiveness of law. Sufficient safeguards, he said, have been provided in Canada against injustice, and urged that as a great nation, the conduct of the administration of justice does not need a censor in London.

Will Soon Step Aside in Favor of Pileuski Say Politicians

Warsaw.—The hectic career of Professor Ignacy Pileuski—variously known as a rebel's son, a world famous inventor, and once a fugitive from his country—has reached a climax in his election to the presidency of Poland, in which office he will fill the role of Joseph Pilsudski's puppet.

Warsaw received news of his election with a calm that was almost disinterested. Pileuski will be president for a day, say the politically wise of the capital—long enough to shoulder the blame for any mistakes of the transition period—then he will step aside when the constitution of Poland has been re-shaped to suit the dictator, and Pileuski will take over the office along with the power which in reality will be his all alone.

Wembley Will Be Sold At Auction

No Private Tender Have Been Received By Liquidator

LONDON.—Wembley is to be sold. The liquidator, after valuing and endorsing to get a bid for the great exhibition grounds and buildings by private tender, have decided to put the whole up at public auction.

The site covers about 132 acres, and the sale will include the Palace of Engineering, the Palace of Industry, as well as the site of the stadium which will accommodate 100,000 people. Several of the Dominion pavilions will also be included in the sale.

Attempt To Criticize King George Quashed

Liberties Told By Speaker It Would Not Be Allowed

LONDON.—An address of thanks to King George for his proclamation constituting the state of emergency because of the strike was made in the House of Commons on April 19.

An attempt to criticize the King by some of the Liberals, notably the Clydesdale, G. Buchanan, was quickly quashed. The speaker told the Liberals that they were not to bring the sovereign's name into the discussion because what he had done was done on the advice of his ministers.

SERIOUS SPLIT IN LIBERAL PARTY IN GREAT BRITAIN

LONDON.—That the Liberal party of Great Britain has been completely split asunder and that all political cohesion between the Earl of Oxford and Asquith, leader of the party, and David Lloyd George, its parliamentary chairman, has been irrevocably ended is admitted by the Liberals themselves, no matter to which leader they are adhering.

Pending further developments following letters from the Earl of Oxford and his supporters, it is assumed that the Liberals in parliament will form into two groups and act independently of each other.

The National Liberal Federation, the main organization of the party, will meet the week after next. The creation of party leadership is expected to dominate all other business. It is reported that the federation will be asked to vote confidence in the Earl of Oxford.

The Daily News says nothing new can save Liberalism but action by the rank and file of the party who themselves must achieve its salvation.

## FINISH DRYDOCK SOON

VICTORIA.—The new \$4,000,000 government drydock here will shortly be completed. The gate is nearing completion at Yarrow, Limited. Tenders have been closed for the construction of two electrically operated cranes. This will be the first contract to be let before the official opening, to be held the third week in August.

## Calgary Candidates

Calgary.—For the five members to be elected by proportional representation in the city of Calgary, Liberals decided to place three candidates in the field. On the first ballot they chose R. C. Marshall, sitting member of the legislature, Mrs. Nellie McClure, author and lecturer, member of the legislature last session for Edmonton, and Mayor George H. Webster.

## Labour Conditions In Orient

Geneva.—Eighty-three thousand Japanese women work in the mines and 45,000 of them labor in the darkest depths. Japanese representatives told the International Labor Conference here.

This admission followed an assertion of Miss Margaret Bondfield, British labor worker, that working conditions in Japan, China and India were "intolerable."

## Finch Drydock Soon

VICTORIA.—The new \$4,000,000 government drydock here will shortly be completed. The gate is nearing completion at Yarrow, Limited. Tenders have been closed for the construction of two electrically operated cranes. This will be the first contract to be let before the official opening, to be held the third week in August.

### International Coal Co.'s New Tipples

(Continued from page 1)

heavy and light, the bone in the coal, does not get a chance to be lifted and to climb over the riffles until these riffles become lower nearer the discharge end. It will be seen that the particles having different specific gravities, not only stratify themselves in layers at top, middle and bottom of the deck load, but also take different paths and eventually discharge each at a given point. When the products finally reach the end of the stable, they are discharged into separate chutes which deliver onto traveling conveyors whose duty it is to carry the coal to storage bins ready for shipment.

The tipples screens, Hammer screens and air tables are designed to separate and clean coal to the following sizes:

- 3 in. and over.
- 2 in. to 3 in.
- 1 1/2 in. to 2 in.
- 1 in. to 1 1/2 in.
- 3/4 in. to 1 in.

giving a range of sizes to suit all requirements.

While the use of air at pressure would ordinarily tend to create dust within the building, this plant has in conjunction with its machinery an elaborate system of dust collection. The tables have closely fitted hoods, which are connected by pipes to two large fans and collectors, the function of which is to draw off the dust as made and deposit it in the collectors. The screens are entirely enclosed, thus leading any dust made directly to the tables, where it is drawn off as above described.

With these most up-to-date facilities for handling, screening, sizing and cleaning of coal, the International Coal and Coke Co. Ltd. is now in a position to ship any size of coal required by their customers free from impurities, and low in ash, and will be able to compete with the best American coals which have previously maintained such a strong foothold in the Manitoba market, and at times even further west.

The old tipples just about to be discarded has been in operation since 1908; consequently it lacks many modern improvements necessary to the highest class preparation of coal, but having handled approximately six million tons of coal it has well served its day and generation, and it is expected that the passing of this structure and the operation of the new will bring much added prosperity to the town of Coleman.

The new plant was designed by H. W. Saunders, Mining Engineer of McComas, West Virginia (a Canadian-born graduate of Toronto University, who has been in close touch with this process since its early development) working, of course, in conjunction with the staff of the International Coal & Coke Co. Ltd.

The contract for supplying all material including steel work, all masonry such as chimneys, foundations, screens, etc., together with construction and erection, was given to The Manitoba Bridge & Iron Works, Ltd., of Winnipeg, Manitoba, and it must be gratifying to this all-Canadian company to have successfully carried out this unusual and important undertaking. The Dust Collector System was manufactured and installed by The B. F. Sturtevant Co. of Canada, Ltd., Galt, Ontario, planters in this class of work. Ball-bearing motors were furnished by The Canadian Westinghouse Co. Ltd., transformers and other electrical supplies by The Canadian General Electric Co. Ltd., and the wiring, control and protective equipment for the motors was furnished and installed by The Crane-Cassidy Electric Company, electrical engineers, of Calgary. All concrete work was done by J. S. D'Appolonia, contractor, of Coleman. The erection of all steel and material, except as noted above, was done by The McDougall Construction Company, of Calgary, and the equipment for the moving and dumping of mine cars was supplied by The Car Dumper & Equipment Company, of Chicago, a firm specializing in this class of work. The railway and mine car scales were supplied by The Gurney Scale Co. Ltd., of Hamilton, Ontario.

The Hammer screens are patented and built by The W. S. Tyler Co., of Cleveland, Ohio, a firm specializing in the building of screens of all kinds.

The patent rights for the Tables are now held by The American Engineering Corporation, of Welch, W. Va., and although these tables were formerly built by Sutton, Steele & Steele, of Dallas, Texas, the Coleman tables were built in the shops of The Manitoba Bridge & Iron Works, Ltd., in Winnipeg.

The various types of units entering into the completed plant are so intimately related that great credit

is due to the several firms concerned in getting the necessary co-ordination of their various equipments; this result of the work having been undertaken by The Manitoba Bridge & Iron Works, Ltd., through their engineers, Messrs. Mackay & Donkin.

### SCOUT NEWS

Come On Out!

No. 1 and 2 Troops have offered to assist at the Red Cross concert in the Opera House on Sunday, June 13th, and the demonstration on the 20th in the Park.

No. 2 Troop, with the consent of the local association, will henceforth go under the name of the Crusader Troop.

Eight boys of No. 2 have successfully passed the fire lighting and cooking tests.

No. 2 Troop invaded Hillcrest on Wednesday afternoon and defeated a picked baseball team of that town. Leosky & Lelievre kindly loaned their truck, and with R. Bell at the wheel, the boys had a safe and pleasant journey.

Quite a number of letters have been posted in the local post office being prepaid by a 2c stamp where the 3c rate applies. There seems to be a misunderstanding, as the reduced rate from 3c to 2c does not come into effect until July 1st.

Mrs. Kilgannon was the fortunate winner of the radio set contest recently put on by Chas. Nicholas. Michel baseball team failed to put in an appearance here Wednesday night and the game scheduled was called off.

Business conditions on the Pacific Coast continue on the upward trend with great activity in construction work. The lumber industry outlook is brighter and there have been important developments in new sawmill construction. The fishing industry is on a better footing, pulp and paper mills are active and additional power programmes are being worked out.

A. M. Johnson, President of the Canadian Club of Boston, visited Montreal for the first time on the new "Redwing" trail now running between the two cities on Canadian Pacific lines. In telling of the charitable and naturalization aid given Canadians by the Canadian Club of Boston, Mr. Johnson said there were some 100,000 Canadians in the State of Massachusetts. Of this number 80,000 are in Boston.

Sir Esme Howard, British Ambassador to the United States, stayed on his arrival in Toronto on a C.P.R. train that the question of European peace was the most urgent and immediate problem of the day. It was necessary for Great Britain to assist in maintaining peace and the League of Nations offered a suitable vehicle. Sir Esme claimed that if the League disappeared England would be compelled to join some European combination against any country which threatened to dominate the continent.

Net earnings of the Canadian Pacific Railway for March were \$2,824,171, an increase of \$705,965 over the same period last year, and the best March net since 1918. For the three months ending March 31 net earnings were \$8,551,067, an increase of \$2,875,285 over the corresponding period of last year and the best showing for the three months since 1917. Gross earnings for March were up \$1,350,271, while expenses increased only \$685,206.

### Say It With Flowers

When you require flowers artistically arranged for any occasion, at moderate prices, and of unequalled quality, phone No. 13, THE COLEMAN TRADING CO., LTD., agents for Frache Bros., Lethbridge, advt.

The Coleman Catholic Church Choir visited Hillcrest on Sunday, June 6th, and rendered the music for a mass at St. Theresa Church there. The congregation greatly appreciated the fine singing.

Miss May Muir returned to Coleman from the Calgary Normal last Saturday in order to make a short visit with her parents before taking charge of a school near Medicine Hat. May has been receiving the congratulations of her many friends for having passed her recent examinations with honors.

A Grand Concert in aid of the Red Cross Society will be held at 8.30 p. m. in the Opera House, on Sunday, June 13th. A splendid program has been prepared for this occasion.

# Owing To Increase In Population World May Soon Be Facing A Very Serious Food Shortage

Soy beans, peanuts and bananas may rank among the world's most important sources of food and the consumption of fish will increase tremendously in the next century, thinks Dr. Samuel C. Prescott, head of the department of biology at Massachusetts Institute of Technology.

Speaking on "The World's Food Supply—Its Sources and Preservation," Dr. Prescott revealed that natural scientists, looking 100 years into the future, are already searching the earth for new sources of food and seeking means of conserving the known sources to avert a shortage in the next century.

It is estimated, he said, that the United States with a population of approximately 110,000,000, produces only enough food to feed a population of about 16,000,000. The fact that the world's population has doubled in 60 years, he pointed out, is an indication of the importance of losing no time in finding new sources of foods and using the present supply more effectively.

The first great retrenchment in the world's food supply will come in meat, Dr. Prescott declared, in forecasting that the present generation may live to see "great proportion of its meat coming from the tundra of the Arctic and the countries of the tropics, where the goat and some types of cattle can be raised."

Land in the temperate zone now used for cattle raising will in the future be given over to intensive agricultural purposes wherever soil conditions and water supply will permit. Corn will probably be more generally used as human food in the future, and additional use will be made of grains now often scorned, he said. Already a palatable flour is being made from bananas, which have practically the same nutritive value as potatoes, and such flour may find use in connection with cereals in supplying carbohydrates, according to Dr. Prescott.

## Advantages Of Egg Grading

Results in Stronger Demand and in Better Prices.

The advantages of egg grading are becoming more apparent every day and it is resulting in a rapidly increased per capita consumption. According to officers of the Dominion Live Stock branch this increased consumption has amounted to over ten dozen eggs per person in the last five years, and during that period prices have been more uniform and more profitable to producers than ever before. The great deterrent in the way of increased production in the past has been the fact that too often one egg found to be rood was no criterion of what the next would be. Grading has resulted in a dependable product, thereby increasing the demand and maintaining the price.

## Likes Canadian Cattle

Shipment of Steers Pleases a Former Opponent of Cattle Trade in Britain

Col. H. A. Mallins (Conservative, Marquette) said in the House of Commons that he had received a letter from Lord Hildeloe, under-secretary of state for agriculture, in which the government, stating that he had received the Canadian steers and that he was very much pleased with them. Lord Hildeloe was formerly an enemy of the cattle trade.

"Colonel Mallins asked if anything was being done to facilitate the transportation of Canadian cattle."

Mr. Motherwell said that everything possible was being done. New plans were now about and later developments might be expected.

**Fox Farming in Manitoba**

Fox farming has been making considerable progress in the Brandon district during the past couple of years. Two large ranches are now located quite close to Brandon, in which a large sum of money has been invested. A syndicate has about 57 pairs of silver black foxes, while a pool has about 17 pairs of the same kind of animals on a newly established ranch.

**Big Oil Production**

With a single well producing oil of exceptionally high quality at a rate of 150,000 barrels a year, the value of the oil resources of the province seems about to be established. This well is the largest producing well in Canada.

A micro-micro-second, a millionth of a millionth of a second, can now be measured by a new invention.

## May Benefit Agriculture

Discovery Made By Member of Staff of the University of Alberta Is Announced

A discovery which may be of far-reaching consequences to practical agriculture and especially to the cultivation of oats, has been made by Leonard Huskins, member of the staff of the University of Alberta, according to an announcement in the London Daily Telegraph. Working under Professor Kings, of the department of botany at King's College, Cambridge, on the subject of genetics and cytology of oats, Mr. Huskins is said to have established the fact that "transient" or "false wild" oats are a special type of mutation brought about by a loss of hereditary material known as chromosomes, or by an interchange of certain portions of them.

It is considered that as a result of Mr. Huskins' discovery the line of research for the total eradication of false oats should be fairly open.

Mr. Huskins is holder of one of the three scholarships offered annually in Canada by the Permanent Royal Commission for the Exhibition of 1925.

## Britain Is Famous For Pedigree Stock

One Industry in Which Country Reigns Supreme

There is one industry—the breeding of pedigree stock—in which Britain remains supreme. From ponies and from sheep to short horns, British breeds are acknowledged to be the best in the world and are bought by foreigners at high prices to improve the foreign breeds. During 1925 the Russian Government bought from British breeders 250 pedigree pigs.

England has always been famous for her cattle and her sheep. Nearly 300 years ago huge oxen were produced there. In his diary, Evelyn speaks of an ox that was 19 hands high and four yards long, and that was in 1649. At that date Leicestershire sheep had already obtained a great reputation and fetched high prices. The merino sheep, of which Wales, one of which at recently yielded 15½ pounds of wool a clip, are of purely British descent.

## England Improving Highways

Blossoming Trees Transform Main Routes Into Shady Avenues

A vision of highways transformed into shady avenues of flowering trees is created by the suggested improvements for the new arterial roads that are appearing in all parts of England. When these were first constructed it was found that, though they served their main purpose well, they still appeared broad, smooth tracks without any claims to beauty.

Under the Roads Improvement Act, passed in August, 1925, it is possible to remedy this fault in several ways. The most practical method, and one that has already been adopted in certain instances, is to line the broad stretches with blossoming trees planted at short intervals.

Midsex is the first county to attempt to beautify its roads in this fashion, and by the end of the year 30 miles of the main routes in this county will be turned into fine avenues of trees.

## Impressed With Canada's Wealth

Resources Worth Working For Says Duchess of Athol

The Duchess of Athol, under secretary of state for education, who has returned to London from a tour of Canada, is considerably impressed with the latent wealth of the Dominion.

In an interview the Duchess said that while Canada was already a great and wealthy country, the resources yet to be developed were well worthy of all the toil and sweat and blood of the British empire could devote to it.

One conclusion which had been formed on her trip, she said, was the pavement roads in Canada for motor and female immigration of the "right sort."

**At A Standstill**

"Yes," said the young writer, "I've pretty deep into my new novel now."

"Ah," remarked his friend, "the plot is thickening, eh?"

"Yes, I guess it is; at any rate, I'm stuck."

## Manitoba Farm Boys' Camp

Party of Ninety Boys From Rural Manitoba to Attend Brandon Fair

Arrangements are well under way to entertain at the Provincial Exhibition, Brandon, a party of ninety boys from all parts of rural Manitoba. Teams composed of three boys, ranging from fourteen to nineteen years of age are representing their respective districts, at the third annual Farm Boys' Camp, which is now one of the leading features at the provincial exhibition.

This year the camp will open the evening of Tuesday, June 23rd, and will continue until Friday evening. While in camp the boys will be the guests of the exhibition board.

The livestock judging competition, which is a feature of the camp, will commence Wednesday morning. Classes of horses, beef and dairy cattle, sheep and swine, will be judged by the boys.

The McKinley Cup, which is competing for annually goes to the team scoring highest. Gold medals donated by the Manitoba department of agriculture will be awarded to each member of the winning team; silver medal to the second highest team. Liberal cash prizes are offered to those scoring highest in each class of stock. Mr. James A. Richardson, of the Winnipeg Grain Exchange, has donated a handsome gold watch for the boy with the highest aggregate score and a silver watch to the second highest aggregate.

In addition to the judging competition, an interesting programme is being arranged. This will include, on the evening of the grandstand, an opportunity of seeing all departments of the exhibition, a visit to the Dominion experimental farm, and points in and around Brandon.

Entries have been received from some twenty-five points throughout the province. Some of the new points entering a team for the first time include Grosset Lake, Swan River, Orléans, Quilich, Clatter, Elmhurst, Virde, Morris and Neepawa.

## Egg-Laying Contests

Improvement Brought About By Better Selection of Individual Birds

The Canadian national egg laying contests have now been in operation for six years. In a survey of the work in its latest report, the Dominion poultry husbandman states that the average production in the last year was 172.2 eggs per hen as compared with 122.5 eggs in the 1919-20 contest. This striking improvement was in a large degree brought about by better selection of individual birds used in the contest, choosing pairs of proper age and development, advanced methods of breeding, and improved cost management. Predictions made in the contest show that the average bird brings a net income of \$2.90, which is a fairly good profit.

## Saskatchewan Egg Pool

The new Saskatchewan Egg Pool within one week shipped from the Saskatoon branch seven carloads of eggs to Montreal and eastern points as many as three hundred cases a day are being received and Saskatoon's daily total exceeds the combined daily receipts of all other provincial branches.

## Pleasure Tours Instead of Train Trips During English Strike

Not even a general strike involving the company's offices, Trafalgar Square, London, for Liverpool, on Thursday, May 6. The motor car ran on regular train time schedules, giving the travellers ample time to make the usual arrangements. All of the travellers voted the motor trip through England well worth while.

## Profitable Lamb Feeding

Illinois Man's Method For Preparing Stock-For Market

"Buying right and selling to advantage are only half the battle in profitable lamb feeding," F. B. Lloyd, of Sycamore, Ill., says. He fattens 600 lambs a year on his 240-acre farm.

"For the first sixty days it costs little to put on ten pounds of gain per head. The lambs have the run of cornfield, meadow, pasture and stubble, picking up feed which otherwise would go to waste. At night they get a handful of barley and a little clover or alfalfa hay. If the rustling is good the lambs don't care for much other feed."

After sixty days I shut them up and feed barley and hay. During the last six weeks I feed a little corn. Usually they top the market. If they have had half a start while on rough feed.

As a rule I keep lambs four to five months, depending upon the market. By this time a 50-pound feeder will weigh about 80 pounds, the size liked best by buyers. If the market gets to acting up during the feeding period because of the first cheap ten pounds, I'm in position to dump them at the original price, or even a little less, and still be ahead."

## Adds To Land Values

Alberta Tax Land Farms Past Which Telephone Wires Are Strung

The Alberta Government has suggested a tax on lands past which telephone wires are strung, and there has been only an outcry against the proposal. Why, says one, should a farmer pay for something which he does not want in order to help another man secure a phone? But the phone man's point out that often the land line may pass many unimproved farms which are held for speculative purposes and as the running of the telephone past these farms certainly adds to their value, why should they not pay for the added value. It is significant that the United Farmers of Alberta have placed their imprimatur upon the proposal, and it will probably become law.

## Excellent Ranching District

Shipment of Cattle Sent 600 Miles North of Edmonton

A large number of cattle were sent this spring to the Fort Fitzgerald country, 600 miles north of Edmonton. They were taken by train to McMurray and thence by boat to their destination. Although the Fitzgerald district is far north, on the line of Alberta's boundary, it contains an excellent farming and ranching area, and has been proved suitable for the raising of livestock. This will be Canada's farthest north ranching district.

## Alberta Seeks For Paving Purposes

Jedite arrangements for testing the McMurray sands for paving purposes have again been entered into between the Edmonton city authorities and Thomas Draper, owner of extensive holdings in the north. Similar experiments to those made last summer will again be performed.

Bad news and soft boiled eggs should be broken gently.

# Points The Way To A Stronger National Sentiment And A Stronger Canadianism

## Lightens Farm Tasks

Pittsburg Farmers Cultivate Crops To Music of Radio

Farmers and commutators in the southern border of Pennsylvania are cultivating their crops to the music of radio. No longer is there a question of keeping the hired man in the fields till sundown—not when he can play his horn in time to his favorite jazz. No longer do the boys run off to the village when the baseball season and music by the band is carried to them by the loud speaker erected in the farmyard.

In Western Pennsylvania the sun is still high in the sky and it is still afternoon on the farm when the car radio stations begin their programmes. Why should the music be lost? The farm has place the receiving set in the wheelbarrow, erect a temporary aerial drive an iron pin in the ploughed earth for a ground and tune in.

The craze for outdoor radio reception has spread and cabinet sets are readily transported from the houses to wheelbarrows, express wagons and dog carts and carried to the fields and gardens. Must keep the boys at work, the farmers say, and the commutators, while filling their gardens and flower beds, do not miss the programmes to which they were accustomed during the winter.

## Canada Could Extend Market

British Honduras and Other Southern Countries Would Buy Canadian Products

Canadian manufacturers are losing much by not paying more attention to their Central and South American trade, in the opinion of his excellency Major J. A. Burdon, C.M.G., governor of British Honduras, who spent a day at the Fort Garry Hotel, Winnipeg, recently. His excellency called attention to the fact that Canada exports very little outside of wheat products to the countries on the equator, and stated that the United States and Germany are selling goods there which might well be sent from Canada. People in these countries, and in British Honduras especially, would buy Canadian goods if they were offered in the right way, he said, but so far Canadian merchants have not gone to the trouble to present their goods in a manner which appeals. While 98 per cent of the flour used in British Honduras is from the Canadian west, there is an appalling scarcity of other goods, he said.

## Real Estate Values

The United States paid \$295 an acre for the Virgin Islands, \$25.50 an acre for the Canal Zone, 25 cents for the Philippines and 2 cents for Alaska—Dakota Independent.

Brazil uses convict labor in much of its road construction.

Brazil occupies an area equal to that of Europe.

## Would Teach Housewives

Advocate Expert to Educate Housekeepers Re Points On Beef

Several speakers at the annual meeting of the Canadian Cattle and Livestock Union held in Toronto emphasized the need for a "better beef" campaign throughout the Dominion. Equal in importance with the necessity of improving the quality of beef was the necessity for educating the consumer to an appreciation of what good beef really meant.

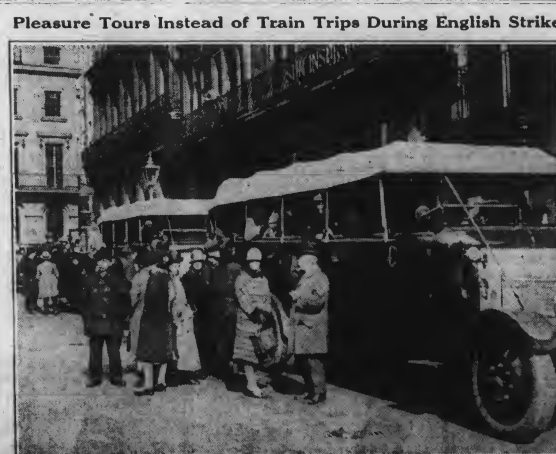

W. H. Porter, of London, Ont., advocated the employment by the federal livestock branch of an expert who would be available for educational work among consumers, to give practical demonstrations of the difference between good cuts and poor ones. Canadian housewives, as a general thing, did not know good beef declared Mr. Porter.

**Saving Nitrogen Fertilizer**

New Product May Soon Be Placed On Market

Each year 20,000 tons of nitrogen are lost down the sewers of the United States. The first step in the recovery for the farmer of this essential plant food has been taken through the erection of an \$8,000,000 sewage disposal plant at Milwaukee, Wisconsin. By using a new method of sewage disposal, Milwaukee plans to accomplish the double purpose of purifying its water supply and saving plant food on the market as a new organic fertilizer.

Most reasonable whales. They no longer get to the top than they begin to blow.

At its best in May, old England presents beautiful rolling downs, long shady roads and charming views, affording a two hundred mile pleasure tour without a more train run. In order to carry out all obligations fully to patrons the Dominion Express Company had a complete fleet of motor cars chartered to deliver and receive shipments during the strike.

## WORLD HAPPENINGS BRIEFLY TOLD

A new dish with all the taste and appearance of ice cream but composed principally of rice powder, is the invention of a San Francisco Chinese.

The customary Dominion Day dinner in London this year has been eliminated in favor of a combined reception, dance and concert, to be held in the Canadian Building.

Sir Herbert Ames, Montreal, financial director of the League of Nations, has tendered his resignation, to take effect next July, according to J. Blicher, his assistant.

Dr. A. G. Doughty, Dominion architect, has been appointed chairman of the public records commission, according to an announcement made in the "Canada Gazette."

About 1,200,000 tons of Alberta coal will be used by the Canadian National Railways in Western Canada this year, according to R. C. Vaughan, vice-president of the Canadian National.

Government terminal elevators in Canada earned a total of \$769,640 in the last crop year and spent \$240,466 in operating expenses, it was stated in the House of Commons in answer to a question.

New Zealand, always a popular borrower in London, asked for another loan, this time of six million pounds, and the issue was subscribed ten times over within an hour. The loan is at five per cent, and the bonds were offered at the price of 98½.

The "Produced-in-Canada" exhibition, whose primary work is declared to be "to help Canadians that they might help themselves," was officially opened in the Hamilton armories by Hon. Harry Cockshutt, lieutenant-governor of Ontario.

Legislation forbidding the removal of Indian relics from British Columbia and designed to prevent their mutilation by vandals will be introduced at the present session of parliament according to word received from Ottawa by the native sons of British Columbia it is announced.

A mileage book is so interesting that a traveller is always sorry when he reaches the last page.

## Modern Highway Across Canada

All-Canadian Road From Halifax To Vancouver Before End of Year

Four different governments have at last heeded the call for an all-Canadian highway stretching from Halifax, N.S., to Vancouver, B.C. Four governments have met on equal ground, and each has pledged the completion of the necessary work. Ontario says: "We are already completing our last remaining link." Alberta is to have its link ready this year. The Dominion Government, speaking for Jasper National Park, states that it will link up with Alberta this year, and British Columbia, the last to fall into line declares, "When the Jasper highway reaches Tete Jaune Cache, British Columbia will have a road ready to carry it to Vancouver." It will be possible to tour across Canada on a modern highway before the end of the present year.

## Stone Age Weapons Efficient

Recently Discovered in England Have Edge Keen As Razor

An arsenal was discovered some months ago in the neighborhood of Chatham, England, believed to have been used by cavemen millions of years ago. Two local men made the discovery about sixteen months ago, and since then about four thousand hammer stones, flint axes and scrapers, and other worked flints, have been taken out of the dump. The tools and weapons, although they belong to the earliest period of the Stone Age, are wonderfully efficient. Some of the edges are still as keen as razors.

Dr. A. G. Doughty, Dominion architect, has been appointed chairman of the public records commission, according to an announcement made in the "Canada Gazette."

About 1,200,000 tons of Alberta coal will be used by the Canadian National Railways in Western Canada this year, according to R. C. Vaughan, vice-president of the Canadian National.

## A Health Item Of Interest

A New and Effective Method of Promoting Health

It will be good news to our readers that they now have available a most effective means of promoting health in the home by eliminating the diseases that are transmitted by flies and mosquitoes. FILL, the remarkable insecticide which has been perfected by the Standard Oil Company of N.J. is now obtainable in Canada at almost any drug store, hardware store or grocery store.

For years the research laboratories of the Standard Oil Company of N.J. were engaged in developing a type of insecticide that would be clean, safe and easy to use.

At last their expert entomologists and chemists succeeded in perfecting a thoroughly scientific product superior to the old methods of killing insects, in that it kills all of them that come anywhere in the neighborhood of the application of the spray, and that is very quick and sure in its action.

Having found this wonderful answer to the insecticide problem, they called it "FILL," and under this name it has obtained a huge sale in the United States, and is in fact widely recognized as an aid to home health, by reason of those qualities which make it sure death, not only to flies and mosquitoes, but also to moths, ants, bed bugs and roaches. This wonderful product is now on sale in all parts of Canada.

Sprayed into cracks and crevices where insects hide and breed, FILL destroys both the insects and their eggs. An added advantage is that FILL will not stain the most delicate fabrics. This has been proved by extensive tests.

## Wins High Art Award

Armless Japanese Girl Carried Off Honors in School Exhibition

A Japanese girl, handicapped by the loss of both arms, but possessed of great courage, astonished Tokio art circles by carrying off the honors of the Peersesses' school exhibition. Holding specially constructed brushes between her teeth, Miss Yonoko Yamaguchi, the armless artist, has for several years painted oil, the decorative sash worn by all Japanese women. Some of her work at the exhibit sold for as much as \$500.

Always Ready and Reliable.—Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. This fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

Plans Aerial Expedition

Engineer Antonio Penty, of Buenos Aires, has presented to the ministry of the navy plans for an Argentine aerial expedition to the South Pole and an extensive scientific exploration of the Antarctic continent.

A coward is a man who knows he is wrong and refuses to admit it.

All men are equal before the law, but not before the mother-in-law.

## ON THE AIR

What is Doing in the World of Radio

There has been quite a boom in wireless sets in Paris since the general strike in England, especially among English-speaking residents who used them to get their strike news.

Many persons are suffering from radio deafness because they listen for many hours without removing the ear phones. An ear specialist advises the use of loud speakers.

"Con"—The radio will never take the place of newspapers.

"Denise"—Why?

"Con"—You can't start a fire or line a carpet with a radio set.

Many broadcasting stations are now making public their advertising rates. One United States broadcast station has a rate ranging from \$30 for a quarter of an hour during the day to \$120 for one hour at night.

Tauiligne, the famous priest and scientific electrical engineer, who is noted in France for his inventions as well as his sermons, has just completed what he claims is the first really perfected loud speaker for crystal sets.

Air conditions for radio are best in February, the next best months being March, January and November.

Commercial wireless service inaugurated at Rio Janeiro, Brazil, is in touch with London, New York, Paris, Berlin and Rome.

Santa Rudolph, radio artist, has finished musical manuscripts for \$100,000. She spent four years living with the peasants of Europe, listening to their folk songs and copying them by candle light. She uses these manuscripts for her radio concerts.

Electric power men from all parts of Wisconsin have pledged themselves not only to eliminate power line interference of radio reception, but to assist the radio set owners in finding the source of much of the other outdoor troubles such as violet ray machines, X-rays and such.

When a radio receiving license is granted to a listener in Japan, his set is placed in the wave length of the Tokyo Municipal Broadcast Station and then scaled so that no other station may be tuned in. It is reported that this is done in order that no radical ideas can be picked up if put on the air by secret broadcast stations.

Many people have the mistaken notion that the resistance of headphones is a measure of their quality. Actually, radio headphones of 2,500 ohms resistance are much better than others of 5,000 ohms resistance. The resistance is determined by the length, size and kind of wire used in their construction. Their performance is a matter of proper engineering design and the use of good materials.

The Oil for the Athlete.—In rubbing down, the athlete will find Dr. Thomas' Electric Oil an excellent article. It renders the muscles and sinews pliable, takes the soreness out of them and stretches them for strains that may be put upon them. It stands pre-eminent for this purpose, and athlete who for years have been using it can testify to its value as a lubricant.

## World's Poultry Congress

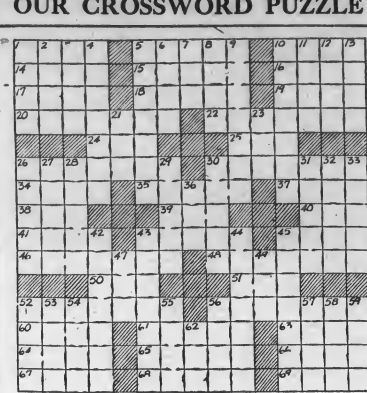

The Belgian minister of agriculture has named official representatives to the World's Poultry Congress at Ottawa, July 27 to August 4, 1927. They are M. Maenhout, member of the House of Representatives, and president of the National Federation of Poultry Societies of Belgium, Lemberge; M. Pilleux-Eman V., editor in chief of the journal Chasse et Pêche; and M. Heyndrickx, Ach. Chasseuse de Bruxelles, Leidsberg.

## To Develop More Power

Two million dollars will be expended by the Winnipeg Electric Company and its subsidiaries in making the necessary provision to obtain and utilize power from the hydro-electric plant at Great Falls during the next eight months, it is announced.

The considerable proportion of this expenditure will be represented by large power machinery, it is stated.

## OUR CROSSWORD PUZZLE

- Horizontal**
- 1-Step.
  - 2-Become excited, put up.
  - 3-Astral body.
  - 4-Old world plant of Italy family.
  - 5-A tooth.
  - 6-Tune of air.
  - 7-Plurals of papers.
  - 8-Variegated w x y quartz.
  - 9-Heaps.
  - 10-Game played in bowling alleys.
  - 11-Entered into the shade.
  - 12-Period of time.
  - 13-Brownish color.
  - 14-Druckels or angle.
  - 15-Long gaiters.
  - 16-Single fling.

  - 22-Story.
  - 23-Girl's name.
  - 24-Consider.
  - 25-Jagged promontory.

## SUNDAY SCHOOL LESSON

JUNE 18

### JOSEPH'S FIDELITY

Golden Text: Reest thou a man diligent in his business? he shall stand before kings. Proverbs 22:29.

Lesson: Genesis 39:1-33.

Devotional Reading: Proverbs 4:10-18.

### Explanations and Comments

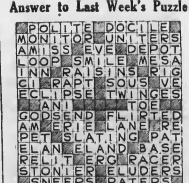

Joseph Becomes House-Steward in Egypt, verses 1-5.—A band of slaves brought Joseph down into Egypt (see The Historical Background) and there sold him to Potiphar, Pharaoh's captain of guard, owing to his personal charm (verse 6). Joseph was a man of noble character and was taken into his master's house as a servant instead of being sent into the fields to labor. What a contrast from his life at home as the favorite son of his father and his free life in the open as a shepherd must have been his life in that Egyptian household! But Joseph was adaptable. In a short time his ability and trustworthiness—a token of God's presence with him—led Potiphar to make him the superintendent of his household, or house-steward. Potiphar's confidence in Joseph was so complete that he put everything into Joseph's hands, save his own food. The exception was probably due to the strict laws of caste in Egypt: see Genesis 34:24, 25:34.

"Character plus capacity plus charm always makes its way." "The Lord made all that he did to prosper. There is no hint of miracle here. Providence works from within outward, as well as from without inward. God honors trustfulness. If you are sure that you are in the hands of the God above, and under his guidance, you have a quicker eye and a steadier hand for the affairs of this life. Prosperity inevitably follows" (R. C. Gillette).

### Prisoners Returned After Holiday

A check-up shows that all the prisoners of the jail at Tucuman, given their freedom for a day on the occasion of the anniversary of Argentina's independence day, returned to the jail.

## Answer to Last Week's Puzzle

## Piracy is Still Practiced

But is Most Common in Oriental Waters.

That pirates still exist is evident by the action taken in Switzerland at one of the League of Nations meetings. It provided for an agreement that warships of all nations may chase pirates into the territorial waters of any other nation. The pirates then will be tried in the country in which they are captured. This action came about in codifying international law and the suggestion on piracy came from a Japanese minister. It is apparent piracy is more common in Oriental waters.

Woman's love for ribbons may be accredited to her having originated from a rib.

## THE STORY THIS FAR

Joanna, pretty, ultra-modern shop girl, is informed by her employer, Graydon, that an unknown man has given her a million dollars to spend as she wishes. There are no strings to the gift—no conditions to meet—she is not even to know the name of her benefactor. She endeavors in vain to learn more from banker Erection, where she meets his nephew, Brandon, a man-about-town, who helps her write her first check and tells her that he intends to make love to her. Dazed with the amount of money, hurt by the fact that her shop girl companions and the merchants with whom she deals, spending her new found fortune, believe her to have gone the limit in securing the money, she returns home that night expecting to meet John, her hopelessly "old-fashioned" girlhood sweetheart.

## CHAPTER VI.—Continued.

"Miss Twenty-seven" had become the slender waist of a lighthouse flower, all perfume, softness and delicate color, beneath her pink wrap she shone vaguely grey; smart grey tailcoat that fell straight from underneath her shoulders, but hugged her hips; skirt that dropped into straight lines without a touch of trimming or of variant pleats or colors; a thing that was infinitely and expensively "avonue"; grey sheer hose of a quality that echoed into the very souls of George and the rest. Slippers, slippers that were wondrous things of some skin with the sheen of grey velvet! A ravishing light hat, grey with a splash of scarlet at the side. George estimated the very simplicities of that hat as next door to being priceless.

A single flower, but that an orchid, nestled at Joanna's waist.

There was an immediate babel of voices, punctuated presently by the sharp reminder of an impatient customer that there were those with wants to be attended to.

"So you weren't fired after all?" George exclaimed when he had summoned her wits. "Here we've

## WOMAN COULD HARDLY WALK

Mrs. Horn Tells how Lydia E. Pinkham's Vegetable Compound Restored Her Health

Hamilton, Ont.—I have taken Lydia E. Pinkham's Vegetable Compound and would not be without it. I had a female trouble so badly I could hardly walk, and I was all run-down and could hardly get around to do my household work. I would be in bed three or four days at a time. I was helped by a friend to try your Vegetable Compound. I did, and by the time I took two bottles I was beginning to get around again. I took ten bottles in all, and now I am all right again and doing my own work. I have six grown-up to work for, so I have plenty to do. I also used Lydia E. Pinkham's Sanative Wash, and I think it is good. I love my health to the Vegetable Compound, and I think if more of it was used women would be better off. I would not be without it if it cost much more.

Mrs. Nellie Horn, 28 St. Matthews Avenue, Hamilton, Ontario.  
Do you feel broken down, nervous and weak sometimes? Lydia E. Pinkham's Vegetable Compound is excellent to take at such a time. It always helps, and if taken regularly and persistently, will relieve this condition.

W. N. N. 1623

you've got to wear your dress looser, little daughter! That black satin you affect is all right. I guess, but when you get the real things that have some honest-to-goodness style in them, why you don't need to wear them so skimpy to look your best. If you don't know what I mean say awake tonight and think it over, George! I'm giving you something straight!"

"So straight it sounds like a sermon to me!" the other girl retorted. "Just this last Sunday, either. But you've got a license all right, I suppose." It was a sentenceson flimsy, but Joanna preferred not to take it up.

Joanna heard Mrs. Adams through half open doors tell other girls in the house that the drawing room has been assigned for the evening and heard the flippant rejoinders that there were lots of other wide open spaces in the world away. After a while, when she had resigned outright one of her new gowns to George as an installment of tomorrow's promise, she thought she heard John come in from the front door. She listened, her lips hot, eyes shining and body trembling, but there was no talk from Mrs. Adams. She fell again to examining herself in her bit of mirror, twisting and squinting to glimpse as much at one time as possible of her gorgeously soft and glimmering evening gown, out of which her throat lifted round and white. She'd always had a frock without sleeves and a fairly low cut neck, but each of these most affairs had made her hungry for something real—something that really would be a gown. At last! What the feel of that dress was to Joanna nobody but Joanna will ever know. She wouldn't admit it herself, and it's the sort of thing that can be painted on a canvas or put into music, but never said in words.

She heard the rattle of the doorbell. She signed to George to be quiet and opened her door an inch or two. She heard Mrs. Adams answering an inquiry, and the voice she heard then was not John's, but the quiet, modulated tones of the man she had met at the bank—Brandon.

She heard Mrs. Adams' confusion. "Why, yes, I'll tell her you're asking for her," the puzzled landlady was saying. "But I don't know whether to put you in the parlor to wait or not. There's someone—her friend—la in there. I've just been talking to him about her. She doesn't know her's yet."

And then Brandon's suave voice: "I am sure we will get on famously, her—her friend and I. We'll talk about her, too, you see if she is very long coming down. I have brought her some flowers. Will you be good enough to hand them to her?"

Joanna heard Mrs. Adams herding him into the "drawing room only" and in her diffident, blundering way nimbly an introduction. To John had come in. She was right when she thought she heard him. And he and Mrs. Adams had been talking together all this time in muffled whispers so she would not know—talking of her. And now Brandon, a man who she thought knew what was a secret from her, had come, as he had lightly threatened, and John would see him. Brandon and John! She wanted to know. She'd never realized before how much.

She didn't know why, but Joanna was afraid as she went downstairs; so soft and young and beautiful in her costly new gown, and so flushed from the day's events, but afraid.

(To be continued)

Produces Cold Light

A demonstration of a method of producing cold light was given recently by a scientist at Manchester, Eng. By the process the electricity is changed to light without the familiar substance being heated in any way.

You can measure civilization's progress by the status it erects to those it once called cranks.

Produce Cold Light  
A demonstration of a method of producing cold light was given recently by a scientist at Manchester, Eng. By the process the electricity is changed to light without the familiar substance being heated in any way.

You can measure civilization's progress by the status it erects to those it once called cranks.

Something very profound was stirring down below the surface of the deep brown eyes of Joanna, but it was still too abstract a confusion for her to grapple with. She was shining again when she reached home, and with as much as a nod, leaving an endless volley of questions completely unanswered, she eluded her way into the front door.

When George arrived, breathless from her rush from the store, Joanna was in the midst of her feverish unpacking of boxes. She had forgotten her place, and George had forgotten her offense apparently. She plunged in to help, vainly trying to get in questions between her squeals of delight over the procession of surprising new things. Whatever pertinent queries she had treasured up against opportunity to voice them were effectually silenced when Joanna remarked:

"Lay off tomorrow, George. Get sick or have a bore or something. I'm going to take you to some place I found today and buy you some real things—whatever you want. But

"Lay off tomorrow, George. Get sick or have a bore or something. I'm going to take you to some place I found today and buy you some real things—whatever you want. But

## A Pessimistic Picture

Fears Women in United States Will Soon Be Ugly

Intelligence and beauty go together, and because the most intelligent section of the population is having small families, the American woman is becoming ugly, states Albert Edward Wigman, scientific writer. The most intelligent 25 per cent. of the population are having only one or two children to a family, while the least intelligent, and ugliest, 25 per cent. are producing three or four.

"If this process goes on, beautiful women will soon be remembered only in pictures," he said. "And when beauty declines, intelligence, moral health, sanity and longevity go with it, because all are linked with beauty."

## Little Helps For This Week

Not slothful in business, fervent in spirit, serving the Lord.—Rom. xii, 11.

Since Thou hast added now, O God: "To my life now, day by day, and I give it me leave to walk abroad And labor in my lawful way. My walks and works with me begin! Conduct me forth and bring me in."

Remember that if the opportunities for great deeds should never come the opportunity for good deeds is renewed for you day by day. The thing for us to long for is the goodness, not for glory.—Frederic W. Farrar.

## Likely In Canada Too

Large Percentage of Earnings Spent On Motor Cars

It is only 25 years since the automobile emerged as a commercial product, and today the manufacture of motor vehicles takes first place among American industries. The bureau of industrial technology estimates our annual automobile bill at \$14,000,000. This makes an interesting comparison with the total business of our retail stores, which has been estimated at \$25,000,000,000. Computations of this sort are obviously subject to a wide margin of error, but it seems safe to conclude that, roughly, for every dollar spent for food, clothing and house furnishings, we spend 40 cents on motor cars and their upkeep.—New York World.

## Asparagus Used Centuries Ago

Culture of Plant Introduced Into England During Reign of William III. Before the days of Henry VIII, vegetable gardens were not made in England. Asparagus, with its remarkable properties, was used as a food 200 B.C., and though our Tudor ancestors ate the whole of the stalks with spoons, the culture of this plant was not introduced until the reign of William III, when Sir William Temple brought it from the Hague. The King, visiting Sir William at Moor Park, showed Jonathan Swift, the secretary, how to eat it in Dutch style. "King William always ate the stalks whole," said Swift.

## Short Story

Shotgun. Flax hunter. Subtle field. Brown bear. Bang! Bang! Please omit flowers.

Minard's Liniment for backache

A man is prouder of things he thinks he can accomplish than of those he really can.

Wise mothers who know the virtues of Mother Gray's Kidney Pills for always have it at hand, because it proves its value.

It takes forty years to make a military machine; four years to break it; a million years to learn better.

Use Minard's Liniment in the stable

## Could Not Remember Wife's Christian Name

Elderly Farmer Had Never Used It in Addressing Her

In certain parts of rural England it is uncommon for a man to address his wife by her baptismal name, an illustration of which Thomas Hardy, the novelist, recently told the following story. An elderly farmer called in a lawyer and explained that he wished to make his will. The lawyer took out his fountain pen, and prepared to receive his client's instructions. "I'll leave all my brass to my wife," the farmer said. "We've been married thirty years." "What's your wife's Christian name?" asked the lawyer, making a note of the bequest. The farmer scratched his head, thought hard for several seconds, and finally said that he couldn't remember. The lawyer thought of a plan that would spur his memory. "Walk to the door," he suggested, "and shout upstairs as if you were calling her." The farmer did, and shouted, "Missus."

## Laboring Under A Mistake

Colored Pastor Had To Do His Own Wood Cutting

"Bredren, sisters," said the pastor, sadly, surveying his dark flock with a face full of woe, "When I done took this congregation I was promised a salary. This salary was to be paid in chickens. I have been expounding scripture for two months, and now I wishes to ask—what is den chickens?" There was a long silence.

Then a faint deacon arose and said: "Reverend father, we are, and heartily sorry that you have been victim of a mistake. You has misunderstood de method ob how our pastors is paid. We provide yo' wid lanterns and two gunysacks and den yo' collects dat salary yo'self."

## Microscopes Used In Detection Of Crime

Reveals Many Things Naked Eye Would Never See

While Sherlock Holmes has been depicted as an inveterate user of the microscope—or common magnifying glass—his work of the kind was as nothing to that now being done in New York. In the use of magnifying instruments in the detection of crime, particles of dust and lint almost too fine to be noticed with the naked eye have been linked with scenes of crime, after being taken from the persons of suspects.

## Women Learn Engine Driving

A school has been opened at Belgrade to teach women to drive steam locomotives. Women pupils do not discard the skirt, which in fact they wear rather long, but practical work probably will make graduates adopt trousers and overalls, as so many women did in France when forced by the war to take up men's professions.

## Big Sale Still Going Strong!

The Quimette Close Out Sale is still going strong, and many good bargains are being offered to the people of The Pass in another big full sheet poster printed by The Journal Job Dept. for this sale on Wednesday. As this sale is drawing to a close, NOW is the time to buy. Don't wait too long to make those purchases you have in mind. Look carefully over this new poster and get your bargains Friday or Saturday.

## Elocution in the C.N.P.M. Festival

Elocution has been promised a prominent position in next year's musical festival to be held at Blairmore.

This art has not been brought to the front in The Pass owing to the lack of a teacher, although much talent was displayed at this year's festival.

It should be interesting to all those who are desirous of following this dramatic art to know that Miss Enid B. Cole, of Bellevue, who has recently graduated from the Bush Conservatory, Chicago, is going to teach in The Pass. Those desiring tuition should read Miss Cole's professional card in The Journal.

## A. Denmore Liberal Choice for Rocky Mountain.

**Wins Over Joe McIntyre and F. Lote on First Ballot—Plans Strenuous Campaign.**

Arthur M. Denmore, general merchant of Lundbreck, was chosen at a convention of the Liberals of Rocky Mountain constituency at Calgary on Monday, to contest the election in the interests of the party. Every poll in the riding was fully represented and enthusiasm ran high.

Mr. Denmore, who is widely known throughout The Pass, and fairly well known in the Banff end of the riding, accepted the nomination in a fighting speech, and promises to make a splendid run, especially in the southern end of the riding. He has been in business in Lundbreck for several years, has done business with many people in The Pass towns, and with the farmers and ranchers of his own district, and is highly regarded. He has always been a staunch Liberal.

This makes a three-cornered fight in the Rocky Mountain riding. The Liberal candidate is the sitting member, P. M. Christophers, and the new Conservative candidate is John Kerr of Passburg.

Mr. Denmore was born in Nova Scotia 41 years ago. Among other things he advocates is old age pensions.

The candidate left Monday night for Banff, Exshaw and other points on the north end of his big riding, all set for a strenuous campaign.

## Nomination Unanimous

J. J. McIntyre, of Bellevue, and Francis Lote, of Hillcrest, were also nominated, but as Mr. Denmore received more than half of the votes cast by the delegates, his nomination was made unanimous.

Unanimous endorsement of Captain Shaw's leadership featured the convention, together with strenuous opposition to continuance of group government in Alberta.

An executive committee was formed under the chairmanship of Alex. M. Morrison, Coleman, with J. E. Gilles, Blairmore, secretary, and members F. Lote, Hillcrest, J. Brewster and D. R. McDonald, Banff.

Coal Creek defeated the local footballers at Coleman on Saturday last by 2-1, in one of the best games seen here this year, despite the fact that the game was rough in spots. Both teams put up a very fair exhibition of soccer.
